

engineers without borders australia

## Not Just For Engineers!

### **EWB MISSION:**

*Engineers Without Borders Australia works with disadvantaged communities to improve their quality of life through education and the implementation of sustainable and appropriate engineering projects. Through the process of helping people in need we become more socially aware and responsible, improve ourselves and inspire others to action.*

### **EWB VISION:**

*EWB envisions a world of opportunity, freedom and dignity for all people and where every community has the information and resources to meet its self-identified development needs. We believe that there is hope for the more than 3 billion poor people on this earth. We also believe that it is our obligation, individually and collectively, to help those less fortunate than ourselves. Fundamental to this vision is our conviction that we can make a difference, which all development workers must share.*

While the focus of this non-profit organisation is on engineering projects and education, non-engineering people are also more than welcome - in fact, to obtain the best possible result we need people who can help the group understand exactly what is needed and appropriate in a given situation; we need people who help can break down barriers to communication (eg. In indigenous and Asian populations); we need people who can help make things happen; we need people to help raise funds and awareness of the group's activities; **everyone has skills that we can use!**

If this sounds like you, have a look at the website at: <http://www.ewb.org.au> or contact the Townsville EWB representatives: Glen Robinson on 0439 771 016 or Geoff Reid on 0407 177 928
